

Trial and TV Personal  
Injury Lawyers are standing  
in the way of the reform and  
restructuring of the one system  
that benefits all South Carolinians.

# Workers' Compensation Reform

Simply put, South Carolina's Workers' Compensation System was established as a no-fault process to help injured workers.

These are the hard-working and dedicated employees who are at the heart of success for any business. Efficiently providing the essential income to support themselves and their families until they are able to go back to work is a responsibility that belongs to all of us.

This system has become fraught with inconsistencies and unpredictable awards. Awards in South Carolina are 185% of the medical guidelines that are used by more than half of the states.

Trial and TV Personal Injury Lawyers are responsible for this out-of-control system. They are standing in the way of real workers' compensation reform because of their greed. It's no longer about the workers. It's about the huge fees charged by this small group of lawyers that is gaming the system.

Businesses, large and small, worry about the negative influence that this group has on the ability for our state to remain competitive in a global environment.

We must do something now before even more jobs are lost.

Please call your Senator and Representative today and urge them to stand with the hard working employees and employers of our state in passing real workers' compensation reform.

Don't let the Trial and TV Personal Injury Lawyers play games with this system any more. They have already done their damage.
